			25X1			
25X1		ordered the Kwangtung military authorities to repair the Canton-Shench and (114-08, 22-32) highway and to widen it by 28 feet so that two-way traffic will be possible. This work, scheduled to be completed by the end of May, is being undertaken to insure the maintenance of traffic between Hong Kong and Canton in the event of effective bombing of the Canton-Kowloon railway during a Nationalist invasion of the China mainland. Chinese Communist authorities believe it will be easier for an enemy to interrupt traffic by bombing the Canton-Kowloon railway than by bombing the Canton-Shench and highway. This belief is based upon the 1937-38 Japanese bombing of the railway.

4 · · · · · · · · · · · · · · · · · · ·	6.	In mid-April roads near the sea coast in Chungshan (113-36, 22-22) Hsien as well as in T'aishan (112-48, 22-15) Hsien were partly demolished in order to prevent any invading troops from proceeding inland. Motor traffic at speeds up to 15 miles per hour is still possible on these roads, but the roads could easily be made completely impassable at short notice.				
			25X1			
	7.	In mid-April Chinese Communist Party workers in Nant ou (113-56, 22-31) were warning residents who obtain travel permits for a visit to Hong Kong that an invasion of Hong Kong is scheduled to take place in the near future. They were also warned not to attempt to remain permanently in Hong Kong because they would be executed by the Chinese Communist authorities when they occupied Hong Kong. 2	25X1			
25X1		l. Comment.	$\neg$			
25X1		most of the highways along the coastal area have been destroyed by the Chinese Communists. Other information available to this office indicates that the Chinese Communists are destroying many access roads along the Kwangtung coast as a defensive measure against invasion and that inland roads and bridges are being greatly improved to bear heavy military traffic.	   25X1			
25X1		Chinese Communist defense measures on the south Kwangtung coast.				
25X1		2. Comment. The Chinese Communists are merely attempting to frighte Hong Kong bound travellers into returning to the mainland as soon as possible.	en.
